

| <b>Category</b>                           | <b>Definition</b>  | <b>Value</b> |
|---|--|--------------|
| <b>Educators</b>                          | Number of educators who participated in NOAA-supported professional development programs that enhance understanding of NOAA-related topics and use of NOAA educational and scientific resources.                         |              |
| <b>P-12 Students</b>                      | Number of P-12 students who participated in NOAA-supported formal education programs that enhance understanding and use of NOAA science and other resources.   |              |
| <b>Postsecondary Students</b>             | Number of postsecondary students trained in NOAA-mission related sciences through NOAA-funded higher education programs that prepare students for career paths at NOAA and related organizations.                        |              |
| <b>Postsecondary Degrees</b>              | Number of postsecondary degrees in NOAA-related disciplines awarded to students who were supported by NOAA in higher education programs.   |              |
| <b>Youth and Adults</b>                   | Number of youth and adults who participated in NOAA-supported informal education programs that promote and inform environmental stewardship and decision-making.   |              |
| <b>Website Visitors</b>                   | Number of website visitors to NOAA Education websites that support a broad spectrum of educational activities and provide critical information to the Nation.  |              |
| <b>Educators that have integrated</b>     | Number of educators who participated in a NOAA-supported professional development program AND have integrated subsequent changes into their classrooms.  |              |
| <b>Educators that intend to integrate</b> | Number of educators who participated in a NOAA-supported professional development program AND INTEND TO integrate subsequent changes into their classrooms.  |              |
| <b>Outreach events participated in</b>    | Number of outreach events participated in (i.e. science days, science bowls, management and/or decision making council meetings, etc.) where OA science or education was shared.   |              |
| <b>Conference presentations</b>           | Number of presentations given at a science or educational professional conference.   |              |
| <b>Social media presence</b>              | Number of social media posts featuring sponsored work.   |              |
| <b>Environmental Action activity</b>      | Number of people engaged in an activity that intentionally addresses an environmental problem, need, or hazard, either directly or indirectly. See <a href="#">here</a> for more definitions of an environmental action. |              |
